

PRESTO

Technical Data Sheet

Water soluble concentrate:

435 g/l of alkyl polyglucoside + glycerol

A spreader, humectant and uptake agent for use with herbicides and fungicides to improve leaf coverage and foliar uptake. PRESTO works by lowering the surface tension of the spray solution giving significantly improved coverage and humectancy on the leaf. Alkyl polyglucoside aids penetration of the wax cuticle and helps open the stomatal pores leading to greater efficacy and uptake of the pesticide.

Composition

Declared Content	% w/w
Alkyl polyglucoside (APG)	38.0

Recommendations for Use

Application Type	Foliar
Crops	Extensive
Rate	At 0.05 % to 0.10 %
Water rate per ha: 200 L	100 ml – 200 ml

Compatibility

PRESTO is most effective with herbicides (SU group, glyphosate) and fungicides (triazoles, azoxystrobin).

Precautionary statements

P102: Keep out of reach of children

P270: Do not eat, drink or smoke when using the product

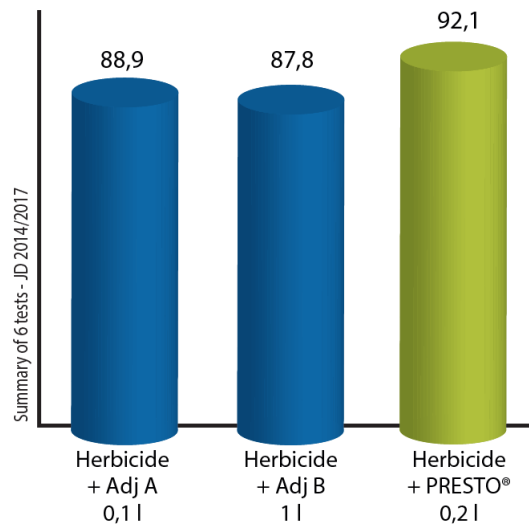

Trial data: with Herbicides

Efficacy of meso-iodosulfuron herbicide on wheat

% efficiency against ryegrass at earing stage
